PROFESSIONAL SUMMARY

Results-driven B.Tech CSE (AI & ML) student at VIT Bhopal with a strong foundation in Full-Stack development and Machine Learning. Proven track record in building end-to-end AI solutions, migrating legacy systems to modern architectures like Go, and managing technical student organizations. Passionate about developing scalable, user-centric applications using the MERN stack and Generative AI.

EDUCATION

VIT Bhopal University

B.Tech CSE in Artificial Intelligence and Machine Learning (CGPA: 8.53/10)

Bhopal, MP

Aug 2023 – Sept 2027

KDMA World School

Higher Secondary Education / Class 12 (Percentage: 76.2%)

Kanpur, UP

2021 – 2022

SKILLS

Languages: Java, C++, Python (TensorFlow, PyTorch), JavaScript (ES6+), SQL, MATLAB

AI/ML & Frameworks: Next.js, React.js, RAG Systems, CNN, Computer Vision

Cloud & Tools: AWS (EC2, S3), Google Cloud Platform, Git/GitHub, Docker, Vercel, Prisma ORM, Postman

Data Systems: PostgreSQL, MongoDB, MS Excel, Power BI

EXPERIENCE

PearlThoughts | AI Engineer Intern

Jan 2026 – Feb 2026

- Optimized backend performance by migrating legacy Python microservices, leveraging concurrency for faster execution.
- Utilized **AST (Abstract Syntax Tree)** analysis to ensure 100% logic accuracy during the automated code translation process.

Suvidha Foundation | Machine Learning Intern

Dec 2025 – Feb 2026

- Researched **Quantum Image Representation (QIR)** to understand the future of secure and high-speed image processing.
- Analyzed quantum encoding frameworks like **FRQI** and **NEQR**, comparing their efficiency against traditional RGB pixel storage.

Defence Warriors Club | President

Oct 2024 – Present

- Manage a core committee of 15 members to organize national-level webinars and physical training sessions for 100+ students.
- Increased student engagement by 50% by launching a digital outreach strategy and a dedicated club portal.

Vitronix Club | Club Coordinator

Sep 2024 – Feb 2026

- Coordinating technical workshops and logistical planning for university hackathons and guest lectures.

PROJECTS

FarmGuard Pro — Plant Disease Detection System

Python, TensorFlow, React, Flask

- Designed a high-performance **CNN model** (ResNet architecture) capable of identifying 15+ plant diseases with 94% accuracy.
- Developed a **Flask API** hosted on Google Colab with **ngrok tunneling** to provide real-time inference to a web frontend.
- Built a responsive React dashboard featuring drag-and-drop image uploads and instant diagnostic recommendations for farmers.

ERPNext AI Code Analyzer

Python, LangChain, Pinecone, Streamlit

- Built a **Retrieval-Augmented Generation (RAG)** system to allow developers to query complex codebases using natural language.
- Integrated **Pinecone Vector Database** to store code embeddings, enabling sub-second semantic search across large repositories.
- Designed a custom Streamlit UI that visualizes code logic, reducing the onboarding time for new developers by approximately 30%.

CERTIFICATIONS

- Google Cloud Generative AI** — Expertise in deploying Foundation Models and fine-tuning LLMs for specific tasks.
- Applied Machine Learning in Python** — Advanced training in Scikit-Learn, data cleaning, and hyperparameter tuning.
- Google IT Support Professional** — Certified in troubleshooting, system administration, and network security protocols.
