

# ABHI PANDEY

abhipandey.4621@email.com | +91-7905374087 | Portfolio | LinkedIn | GitHub

## PROFESSIONAL SUMMARY

Third Year B.Tech CSE (AI & ML) student at VIT Bhopal. Active learner and versatile developer gaining hands-on experience in full-stack applications and machine learning. Continuously improving in C++, SQL, and Python while developing scalable solutions across diverse domains.

## EDUCATION

### VIT Bhopal University

B.Tech CSE in Artificial Intelligence and Machine Learning (CGPA: 8.53/10)

Bhopal, MP

Aug 2023 – Sept 2027

### KDMA World School

Intermediate / Class 12 (Percentage: 76.2%)

Kanpur, UP

2021 – 2022

## SKILLS

**Languages:** Java, C++, Python, JavaScript, SQL, MATLAB, Go (Golang)

**AI/ML & Dev:** Next.js 15, React, Gemini AI, Prisma ORM, Inngest, LangChain, RAG, CNNs

**Tools & Data:** PostgreSQL (Neon), Tailwind CSS, Shadcn UI, AWS, Git, Vercel, Vector DB, Power BI, MS Excel

## EXPERIENCE

### PearlThoughts | AI Engineer Intern

Jan 2026 – Feb 2026

- Migrated functions from Python to type-safe **Go** using an AI-assisted pipeline, ensuring 100% logic parity through **AST (Abstract Syntax Tree)** analysis.
- Implemented **Repository Pattern** and Mocks to decouple logic from DB side effects, achieving a full verified PASS across unit tests.

### Suvidha Foundation | Machine Learning Intern

Dec 2025 – Feb 2026

- Conducted comparative research on **Quantum Image Representation (QIR)** techniques against classical digital image formats.
- Explored foundational quantum encoding methods such as **FRQI** (Flexible Representation of Quantum Images) and **NEQR** to store color and spatial information.

### Defence Warriors Club | Club President

Oct 2024 – Present

- Leading a team of 15+ to manage community initiatives and technical seminars for 100+ aspirants.
- Spearheaded web presence development and streamlined budget/cross-departmental coordination.

### Vitronix Club | Club Coordinator

Sep 2024 – Present

- Coordinating technical workshops and logistical planning for university hackathons and guest lectures.

## PROJECTS

### Farm Plant Disease Detection

Python, TensorFlow, React, OpenCV

- Engineered a **CNN** model to classify plant diseases across 10+ species with 90%+ accuracy.
- Built image processing pipelines using **OpenCV** and trained on a dataset of 25,000+ images.
- Deployed a responsive React dashboard on **Vercel** for instantaneous diagnostic reports.

### ERPNext AI Code Analyzer

Python, LangChain, Vector DB, RAG

- Developed a **RAG** system using **LangChain** to analyze complex codebases via semantic search.
- Reduced developer debugging cycles by 40% by automating logic extraction from source files.
- Designed a **Streamlit** user interface for intuitive interaction with the vector-indexed documentation.

## CERTIFICATIONS

- Google Cloud Generative AI** — Specialized in LLM deployment and Prompt Engineering.
- Applied Machine Learning in Python** — Focused on predictive modeling and clustering.
- Google IT Support Professional Certificate** — Comprehensive training in networking and security.
