PROFESSIONAL SUMMARY

B.Tech CSE (AI & ML) student with hands-on experience in software development and analytical domain, problem-solving, API integration, SQL, and debugging. Proficient in C++, Data Structures & Algorithms, Object-Oriented Programming, Flask, Git/GitHub, and SQL, with experience developing AI-enabled applications.

SKILLS

Software Development: C++, Flask, API Integration, REST APIs, databases, Git, data structures, HTML, CSS, Git, GitHub, Debugging, Problem Solving, SDLC

AI/ML: Pandas, NumPy, CNN, Machine Learning, Data Preprocessing, Model Training, Model Evaluation

Data Analysis: SQL, Microsoft Excel, Google Sheets, Power BI, Dashboard Reporting, analytical domain, problem-solving

EXPERIENCE

PearlThoughts | AI Engineer Intern Jan 2026 – Feb 2026

AI Engineering, Legacy Migration, Code Analysis

- Analyzed legacy codebases and assisted in translating existing application logic into modern frameworks under team guidance.
- Contributed to AI-assisted software migration workflows by analyzing legacy code and identifying transformation requirements.
- Participated in technical reviews focused on code analysis, migration workflows, and software modernization.

PROJECTS

FarmGuard Pro

[GitHub](#)

Python, React, Flask, CNN

- Collaborated in a team to develop a CNN-based system for detecting 15+ plant diseases with 94% accuracy.
- Worked on model development and integration of the trained model with a Flask API.
- Contributed to connecting the AI model with the React-based web interface for real-time predictions.

Insurance Claims Risk Analysis

[GitHub](#)

Python, Excel, SQL, Dashboard Reporting

- Analyzed insurance claims data to study claim frequency, claim amounts, premiums, customer groups, and risk patterns.
- Used SQL and Excel to organize, compare, and validate claims and premium data across different risk groups.
- Did data cleaning and analysis and built a Power BI dashboard to report claim trends, high-risk groups, and key findings.

Codelens — AI Code Review Tool

[GitHub](#)

Python, Flask, Gemini Api

- Developed an AI-based tool that reviews code and provides automated feedback on errors and improvements.
- Built a simple web interface for users to submit code and receive AI-generated reviews.
- Connected the Flask backend with AI services to handle code analysis and response generation.

EDUCATION

VIT University, Bhopal, MP | Aug 2023 – Present | B.Tech CSE (AI & ML), CGPA: 8.82/10

CERTIFICATIONS & ACTIVITIES

- Oracle Cloud Infrastructure AI Foundations Associate (1Z0-1122-26)
- Applied Machine Learning in Python
- Google IT Support Professional
- The Ken's Case Competition 2026
- Tata Imagination Challenge 2026 Product & Case Competitions

EXTRACURRICULAR ACTIVITIES

Defence Warriors Club | President Oct 2024 – June 2026

- Led a 50+ member student team and coordinated activities serving 100+ students through events and career initiatives.
- Organized Upskill in Defence Sector, coordinating students, speakers, and team members for career guidance, SSB preparation, and Q&A sessions.
- Managed team responsibilities, communication, and event execution while working with multiple stakeholders

The VITronix Club | Club Coordinator May 2025 – May 2026

- Coordinated club events and initiatives as part of the core team, supporting member engagement and event execution.
- Supported planning and execution of BattleBots 2026, Electro Nova, Sky Explorers, and Circuit Sprint.
- Coordinated participants, communication, logistics, and event activities.
